## FEC ANNOUNCES SALE OF COMPUTER TAPES

WASHINGTON — Computer tapes are now available for public purchase at the Federal Election Commission covering 1980 campaign finance activities of Presidential primary candidates, candidates for U.S. Senate and House, Democratic and Republican parties and non-party political committees.

This over-the-counter sales policy continues procedures established by the FEC last year by which computer tapes of data contained in various final Reports On Financial Activities were made available following publication of printed volumes.

The Presidential Pre-Nomination Campaigns Report was released on November 15, 1981; the Party and Non-party Final Report was released February 21, 1982; and the FEC released final statistics on 1980 Senate and House campaigns on March 7, 1982.

Prices for the tapes are: Party, U.S. Senate and House, \$65 each; Presidential Primaries, \$80; and Non-party, \$70.

The tapes may be purchased through the Commission's Data Systems Development Division, 1325 K Street, N.W., Washington, D.C. 20463.
