FEC EXPANDS COMPUTER ACCESS TO CAMPAIGN FINANCE DATA

WASHINGTON--Upgrades in its computer programs are enabling the Federal Election Commission to greatly expand its already extensive public access to campaign finance data in connection with Federal elections.

The new system, which was inaugurated today through the FEC's Direct Access Program and its State Access Program, will be available in the near future through its Public Records Office and Press Office.

Information relating to the programs is available through the FEC's Data Systems Development Division in Washington, telephone (202) 376-5230.
